ALLOWANCE

This action is in response to Applicant's amendment and arguments of 2/8/2006, which have been placed in the electronic file of record.

Allowable Subject Matter

Claims 11-14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest, in a portable digital graphic processing device having a dual interface controller, a first memory module and second memory module each storing digital data, and a processor providing graphic processing and computation ability, all stored on a carrier, wherein the dual interface circuit layout includes a first circuit and a second circuit, the first circuit including four spaced-apart pins, the second circuit including six spaced apart pins, and wherein the six pins are located between the four pins and the carrier, and wherein the dual interface controller and the first memory are connected to the data processing circuit by the first circuit and the dual interface controller and the second memory are connected to the data processing circuit by the second circuit.

Notably, the very specific pin configuration detailed in the claim language is neither taught nor suggested in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
